This high potash formula is ideal for overcoming potash deficiency or for building up hardness and tough fibrous qualities of stems and leaves. May be applied in solution by a proportioner through sprinkler systems, by irrigation or any conventional ground rig and may be applied in combination with most insecticides, herbicides and fungicides. Avoid applications during peak sunlight hours.

Turf Spoon Feeding application rates to achieve desired "N" per given area.

Apply every week to ten days in a convenient amount of water for even coverage at rate that gives desired results.
