

# High Cal-Mag Vegetable

14-5-17 **PLUS** TRACE ELEMENTS

**With 7% Calcium and 1% Magnesium**

This high calcium analysis was specifically designed to meet the nutritional needs of field grown vegetable crops when the irrigation waters require a heavy supplement of calcium. The additional calcium supplied by this formula will be adequate to prevent calcium related deficiency such as blossom end rot. For water with at least 60 PPM calcium consider using Nutriculture 15-5-20 with 4.14% Calcium.

With elevated calcium, potassium and magnesium to provide solid root growth, strengthened xylem for nutrient transport through the plant, and healthy chloroplast for light energy converting to chemical energy, this formula will deliver a robust and healthy crop. There is increased boron to promote better flower development and increased fruit set that should produce large and healthy fruit that has good shelf life.

This product should be used in accordance with the Nutriculture Vegetable Growers Product Guide for the specific crops grown and feeding rate should be adjusted to stage of growth and growing conditions being experienced. Contact your dealer or go on the web to [www.plantmarvel.com](http://www.plantmarvel.com) or seek advice from your local extension agent.

For Continuous Liquid Feeding  
**GUARANTEED ANALYSIS**

Total Nitrogen (N) .....	14%
1.95% Ammoniacal Nitrogen	
12.05% Nitrate Nitrogen	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> ) .....	5%
Soluble Potash (K <sub>2</sub> O) .....	17%
Calcium (Ca) .....	7.0%
Magnesium (Mg) .....	1.0%
1.0% Water Soluble Magnesium (Mg)	
Boron (B) .....	0.03%
Copper (Cu) .....	0.03%
0.03% Chelated Copper (Cu)	
Iron (Fe) .....	0.15%
0.15% Chelated Iron (Fe)	
Manganese (Mn) .....	0.07%
0.07% Chelated Manganese (Mn)	
Molybdenum (Mo) .....	0.0070%
Zinc (Zn) .....	0.42%
0.42% Chelated Zinc (Zn)	

Derived from Ammonium Nitrate, Calcium Nitrate, Magnesium Nitrate, Potassium Nitrate, Potassium Phosphate, Borax, Sodium Molybdate, Copper EDTA, Iron in a 2:1 ratio of EDTA and DTPA, Manganese EDTA and Zinc EDTA. Potential basicity equivalent to 175 lbs. Calcium Carbonate per ton.

CAUTION: This fertilizer is to be used on soils which respond to molybdenum. Crops high in molybdenum are toxic to grazing animals.

CAUTION: Boron is recommended for all crops where Boron may be deficient; however, excessive application to susceptible crops may cause damage.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>
