

Cal-Mag 15-5-15 PLUS

with 5% Ca and 2% Mg

- **NPK Ca Mg and trace elements all in one mix**
- **High nitrate N**
- **Quickly corrects Ca deficiencies**
- **Excellent alternate feed for many crops**

Cal-Mag Special 15-5-15 PLUS supplies most of its nitrogen in the nitrate form and is an ideal feed for crops responsive to nitrate nitrogen during low light periods and all ammonium sensitive plants. It is also an ideal source of calcium and magnesium that is immediately available and ideal for overcoming a calcium deficiency. It will maintain solubility in concentrate tank when calcium nitrate and/or magnesium nitrate are added. To avoid calcium precipitation do not mix with other fertilizers or materials that contain phosphate or sulfur compounds.

MIXING RATE FOR 100 PPM NITROGEN

HOSE END SPRAYER: 1:15 ratio- Premix 1.33 oz. in 1 gallon (10 grams per liter).

TANK: 0.09 oz. per gallon (0.67 grams per liter).

PROPORTIONER: 1:100 ratio use 8.89 oz. per gal. of concentrate (67 grams per liter).

OTHER RATIOS: Multiply ratio times weight divided by 100.

OTHER PPM: Multiply desired PPM times weight divided by 100. Increase or decrease PPM according to crop response.

Derived from Ammonium Phosphate, Potassium Nitrate, Ammonium Nitrate, Calcium Nitrate, Magnesium Nitrate, Borax, Sodium Molybdate, Copper EDTA, Iron EDTA, Manganese EDTA and Zinc Sulfate. CAUTION: This fertilizer is to be used on soils which responds to molybdenum. Crops high in molybdenum are toxic to grazing animals. Potential basicity equivalent to 62 lbs. calcium carbonate per ton.

GREENHOUSE Below are suggested feeding rates for various crops. These rates should be adjusted according to crop response. Use the Nitrogen PPM chart (below left) to determine how much fertilizer is required for each gallon of concentrate.
